The water in the pool which is kept at just the right temperature, the gentle massages in the whirlpool bath, the revitalising effect of flushed-through water acts like a meditative mini-journey: it all brings you to life. Enjoy the variety our sauna landscape has on offer and let the power of the magical spring water spoil you.

RADONARIUM

This is the translation of "LEBENSQUELL", and appropriately, it is the power of the magic water which everything revolves around in the **** Bad Zell Lebensquell Hotel & Spa. The rather special Radon spa water of Bad Zell has always brought people to this place of power. You will feel this tradition particularly in our Radonarrium medical centre of excellence with its Radon therapeutic bath applications. Moreover, innovative treatments such as complete body cryotherapy at -110 °C (for the first time in Upper Austria) have found their place here.

The refined gas, Radon helps particularly with complaints of rheumatism, musculoskeletal detri-tions and respiratory illnesses. Radon is taken up by the body through the skin and lungs, where the cell repair mechanisms are then activated. Your individually adapted vitality or therapy plan will support you in revitalising yourself.

SEMINARIUM + OUTDOOR

The environment of an event considerably affects the mood of the participants and therefore also the success of a meeting. We at LEBENSQUELL are aware of this and want to provide you with the feeling of a conference in the countryside with our seminar rooms located by the terrace of the hotel. With over 250 m² we offer space for up to 200 persons as well as the possibility of combining our four seminar rooms in any way to suit your needs.

You will see that there is much to be discovered here in Bad Zell – the whole year round:

•Hiking •Nordic walking •Archery •Cycling •Mountain biking •Tennis •Golf •Climbing •Riding •Winter sports
